

A CLEAN environment is a huge Key to increasing the appeal of many of Maryland's best attractions; water (our Bay), Air, drinking water (our aquifers). A better appeal to our residents and visitors alike will drive a better economy, and enjoyment of Life factors.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

JAY LEES

Lexington Park, MD

a clean transportation future is important to me and right for Maryland -- please do the right thing

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

naomi weisman

Bethesda, MD

A healthy environment is critical for our country and our world.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Joan Tarbell

Frederick, MD

All who have allergies and asthma need clean air to be able to enjoy life and participate in improving our state's quality of life. Clean transportation will enhance life for all

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Helen Bursley-Fournier

Bowie, MD

As a long term young breast cancer survivor, keeping the environment healthy is a crucial priority. A healthy environment makes for healthy people. This lowers costs in medical treatments of all kinds. Please work to limit car pollution. Also work to build better mass transit in Maryland, including Baltimore, to work on this huge priority. Thank you.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Aileen Geraghty

Baltimore, MD

As a school nurse not a day goes by without a child having an asthma attack! We need to immediately clean up this very polluted air to stop the skyrocketing health care costs and loss of life due to lung disease. Every day a child decides not to go to outside recess because they are afraid to be short of breath!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Sandra Weinstein

Arnold, MD

As the Chair of the Greater Baltimore Group of the Sierra Club if we do not change our attitude towards transportation and climate change we are doomed as a species. Please look closely at our health issues and do the right thing!!!!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Deborah Kleinmann

Idlewylde, MD

Baltimore's public transit is poor and inefficient. Updating it and organizing will help the climate and the infrastructure of the city!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Alexandra Szydelski

Nottingham, MD

Cancer runs in our family. Please let our grandchildren grow up with clean air!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Jody Schulman

Woodbine, MD

Can't wait to live in the cleaner world that this will make!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Lunson Tina

Silver Spring, MD

Clean energy is so important for our future generations.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Dudley Lindsley

California, MD

Clearly expanding roads only leads to future traffic problems. We need better, local mass transit. I cannot even get a train (or direct bus) from BWI to Annapolis - the State Capital!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Ginger Woolridge

Annapolis, MD

Climate change is real and man made; we don't have the luxury of pretending otherwise.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Patrice Wells

Accident, MD

Climate change is real. We need public transportation (among other things) to keep the planet viable for our grandchildren.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Marc Knapp

Annapolis, MD

Consider the future for our children and not big business.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Michael Younkins

Keedysville, MD

Dear Governor Hogan, I am a Democrat, but I am a firm supporter of you. You have done so much good for Maryland while in office. I admire you very much. I know this is a hard ask, but for the love of our home, Mother Earth, we must reduce carbon emissions YESTERDAY! Who would rather live on Mars?!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Linda Eckert

Ocean City, MD

Dear Governor Hogan, Maryland has had a good record when it comes to supporting climate change initiatives and solutions to pollution, please sign the bill.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Cathy Schmidt

Trappe, MD

Did Governor Hogan, please sir, please take this petition Or inquiry seriously. Be an innovator sir as your dad was. God bless you.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Barbara Franke

Reisterstown, MD

Dirty fossil fuels used in vehicles need to be phased out quickly so that Maryland families can enjoy a healthy future.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Roland Oehme

Towson, MD

Do it! Don't let your dreams be dreams!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

James Cartwright

Williamsport, MD

Don't / wouldn't you want your children (not just YOURS) children to live long lives breathing CLEAN air?

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

John Hamilton

Columbia, MD

Don't support the interests big business. We all need a clean, healthy environment.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Linda Aston

Laurel, MD

Don't you want to leave a better world for your family?

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Robin Parker

Westminster, MD

Environment is THE critical issue for me. Please help to improve our air quality and quality of life!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Sonya Kunkle

Baltimore, MD

Flooding markets with cheap fossil fuels, and deficit spending, is just mortgaging our future for short-term economic stimulus. We need courageous leadership to truly invest in our future and build a sustainable economy.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Robert Hastings

Cockeysville, MD

For our children & their future. Please care.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Kimberly Torre

Street, MD

Future transportation investments should be directed toward minimizing fossil fuel use!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

John Kester

Silver Spring, MD

Governor Hogan ..take a stand for the climate, please!!!!!!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Linda Wiley

North Beach, MD

Gridlock in Maryland is a growing problem and a threat to the health of humans and other life in our beautiful state. More and bigger roads just pushes the problem down the line and is an old solution that doesn't work anymore. We need to double down on reinvestment in public transit and other clean options.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Laura Place

Silver Spring, MD

Grow green energy local jobs! Solar panels should be built here and dirty polluting coal plants closed!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Sandra Weinstein

Arnold, MD

Help us all avoid asthma attacks

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

MaryAnn Gregory

Westminster, MD

How many people you know have sinus issues or breathing issues? A lot has to do with air pollution not just from here but from the Midwest...it has to stop...please help!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Michael Moran

Columbia, MD

I also feel strongly that planned expansion of I-495 and 270 are not a good idea, but rather funds should be used to improve public transportation, purchase electric buses/school buses.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Julia Bernard

Gaithersburg, MD

I am a free market small government conservative who drives an automobile. I know that the free market is the most effective and efficient way for a society to allocate scarce resources. Therefore I know that subsidizing automobile use, by transferring part of the cost of decision to drive to society as a whole through the free to me cost of the pollution I create, both increases society's costs derived from that pollution (bad economics) as well as increasing the amount of pollution in the air (bad in itself). When I drive I should bear the entire cost. TCI would be a step towards better economics as well as a step towards better air for every Maryland resident.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Chris Yoder

Baltimore, MD

I am SO concerned about our environment an the sooner we begin to make changes to save it for present and future generations the better. If we wait too long, life will be extremely challenging. I believe you are way more wise than our President and I understand MD has a great many needs, but I think the environment must be a priority.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Janet Bradley

Elkridge, MD

I am very frightened about how the use of fossil fuels has contributed to climate change, but even more frightened and concerned that the Trump Administration supports the oil industry and denies climate change. Anything we can do to move away from oil and toward renewable energy is critical at this point. Please use your influence to assist with this cause. Thank you.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Melissa Hutton

Hagerstown, MD

I appreciate Maryland's efforts to promote electric vehicles through rebates, HOV stickers, etc. Please emulate Virginia and initiate electric school bus purchases. Thank you, Mary

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Mary Cramer

Jefferson, MD

I drive electric, we need more electric vehicle incentives

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Susan Metzler

Severn, MD

I have 3 grandchildren under age 3 and I want them to grow-up in an environment that is safe and clean.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Donna Smith

Silver spring, MD

I have problems breathing now at rush hour. I moved here from New York ten years ago and would like to stay in Baltimore but something must be done about the pollution and not having good public transportation keeps people from moving here. We need them!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Barbara Einzig

Baltimore, MD

I know you are working to make Maryland and the Chesapeake environment more green. I believe this bill is an important step in that direction and hope you will fully support it.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Jeff Nelsen

Annapolis, MD

I need a clean air bill to enuuld my

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Dennis Goode

Silver Spring, MD

I realize that Maryland is already a part of this agreement. I urge you to make implementation an urgent priority! Thank you!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Anne Manuel

Silver Spring, MD

I ride the Light Rail to work. There are too few trains and frequently need additional cars. Additionally, MTA must have standard plans for when emergency shuttle buses run, so they are not totally non-standard according to who is driving each shuttle bus.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Deborah Cunningham

Baltimore, MD

I support this and I know you do too! It's more important now than ever.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Sandra Walker

Westminster, MD

I take public transportation every day because it is the right thing to do for our shared environment, but I know lots of people who can't afford to make that right choice because public transportation is simply too inconvenient. Please invest in the public transportation system and help the people do what they know is right!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Danielle Sonnek-Bouchard

Baltimore, MD

I think globally and I act locally. In fact, I act personally! I need my leaders to care for my future, our future, and the future of the country and of the world!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Eugene Lee

Greenbelt, MD

I want my 15 month-old grandchild to grow up to breathe clean air and to be able to travel without creating pollution. Invest in clean transportation.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Christine Manor

Rockville, MD

I work in public education and I see firsthand the effects of air pollution on our children. We have more children than ever before needing inhalers at an early age. Please invest in a cleaner environment for our children's sake!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Diana Georgeson

Rock Hall, MD

I worry for the future of our children. It is easy to postpone actions and say there is still time to transition, but that time is over. Action needs to happen now, it is time for all of us to be our children's heroes

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Barbara Patoka

Arnold, MD

If anything you need to widen I-270 north of Germantown

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Gary Barone

Boyd's, MD

I'm a Democrat and I think you have been doing a great job as governor, but the environmental protection and planning need to take a lead position in the next 5 years. Please consider upgrading public transportation infrastructure before surface road expansion. Thank you, Stephanie

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Stephanie Miller

Baltimore, MD

In line with the regional agreement you signed, please support clean transportation and do not proceed with your short-sighted proposal to expand the Beltway and 270. This will only encourage more GHGs from traffic, as well as more development which will lead to more traffic. Maryland needs REAL transportation solutions, not old-fashioned patches.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Christy Bumanis

Germantown, MD

In my travels, one of the most enjoyable things about any favorite urban area is excellent public transportation. It just makes life a lot more enjoyable, and accessible to all. Marylanders deserve the highest quality of life, and that includes excellent public transportation.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Catherine Cretu

Owings, MD

Investing now will hugely improve Marylanders' health and quality of life. Thank you for the work you do!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Lina Bird

Davidsonville, MD

It is absolutely critical that we limit pollution and protect the environment for our own health and well-being as well as that of future generations!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Anne Sellers

Ellicott City, MD

It takes me 2 1/2 hours to get from Catonsville to Mt Washington via mass transit. 1. EXPRESS BUS #150 IS THE ONLY BUS TRAVERSING ROUTE 40, DOESN'T RUN ON WEEKENDS AND MERELY 3 TIMES IN THE MORNING AND TWICE IN THE AFTERNOON. 2. Then I take the Light Rail from downtown to the Mt Washington stop. 3. I have to walk uphill for 20-30 minutes to get to my office. THIS TAKES ME 2 1/2 HOURS!!! IF I COULD DRIVE, THIS TRIP WOULD TAKE 35 MINUTES. IT'S A PRETTY STRAIGHT ROUTE. GOVERNOR HOGAN...COME ON, MAN!!! WHERE'S THE RED LINE? WHERE'S A DAILY BUS THAT TRAVERSES ROUTE 40? WHERE'S A DAILY BUS THAT TRAVERSES NORTHERN PARKWAY??? AGAIN...COME ON, MAN!!!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Gillian Spencer

Baltimore, MD

It won't matter to us whether we decide to limit climate pollution but it will matter very much to our family members in younger generations. We MUST protect and improve our environment now to make the difference. We can't leave it up to the energy companies to protect our air . Please sign the agreement to limit climate pollution NOW!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Pat Winkelmayr

Ocean Pines, MD

It's time to act aggressively to clean up cars. Please act now, thank you!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Alison Durland

Kensington, MD

It's time to fight to big polluters and make our communities healthier and more prosperous.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Kate Sanner

Westminster, MD

I've been a resident of Maryland for 15 years and the traffic only seems to be getting worse. Yes, air quality has improved in Maryland during that time, but it's still unhealthy to breathe. I hope that additional efforts will be implemented to continue to improve our air and reduce our carbon footprint.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Bryan Duncan

Davidsonville, MD

I've witnessed cars and trucks belching horrible exhaust for years. It's time to do something highly constructive about it. We can reverse global warming with smart policies, strategies and the political will to do so! We need your leadership in this area.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Lisa Krausz

Clarksville, MD

Let's set an example for the rest of the states and clean up Maryland's environment!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Roberta Kasik

Randallstown, MD

Lets have Maryland lead!! Clean air and clean water.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Dana Simson

Salisbury, MD

Living in Baltimore City, I experience daily the grime in the air—particulates that collect in window sills, my AC units, fans, etc and I know that there are even more dangerous invisible substances that threaten our health. Please sign this legislation through to completion! Thank you!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Cinder Hypki

Baltimore, MD

Maryland can continue to be a leader in making significant changes in limiting pollution. Thank you for your work on this.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Pat Beach

Frederick, MD

Maryland needs more electric charging stations in public areas. Near community centers, malls, grocery stores, schools.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

April Swales

Potomac, MD

Maryland needs to be a leader in fighting climate change. It's already here, but we can get ahead of it with your leadership. Don't put greed and money ahead of our planet's livability, please!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Margaret Chen

Annapolis, MD

MD needs to Lead on this issue and get on board now to address climate change, air pollution, water pollution, and destruction of our forests and natural ecosystems that sustain a healthy environment for humans and our native animals and plants.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Jil Swearingen

Cheverly, MD

More cars on the roads is not the solution. Please support stronger transit options, including bus and rail. We need to reduce the number of vehicles, not expand the roads

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Sandra Woiak

Frederick, MD

More public transportation is the way to reduce congestion. Expanded highways only encourage more cars and soon become even more congested than before.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Mary Stickle

Wheaton, MD

Moving to clean transportation will help improve the environment, the planet, and the economy!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Adrianna Magsayo

Elkridge, MD

My children and I have allergies and one has asthma. We need clear air in order to survive. This cannot be put off any longer, especially since the Trump Administration is reducing public health protections. Please sign this agreement and bring clean air back to Maryland. Thank you.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Alan Katz

Owings Mills, MD

My daughter is almost three and I want desperately to know that the world will still be a beautiful place when she is an adult. Please help keep her and other children healthy by helping to get rid of air pollution.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Kendra Totman Padilla

Baltimore, MD

Our Earth is the only home we have. We must take care of it, for ourselves, our children, and our children's children.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Cynthia Neil

Silver Spring, MD

our future depends on these choices we make now!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Joy Ferrante

Montgomery Village, MD

People would prefer a clean environment. Pollution causes health problems, many of them life threatening. We all feel our lives are priceless. The transportation and climate initiative will bring jobs to the area, as well as begin to limit pollution. I am fully behind this initiative. Please sign it! Thank you.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Anita Hudson

Annapolis, MD

Please be the governor who saved Maryland from pollution and who joined the solution to ending climate change.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Pat Simpson

Chesapeake Beach, MD

Please do more to encourage car pooling. Too many commuters are single drivers. Car pooling reduces pollution and reduces traffic so that people can get to work faster.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Philip Young

Frederick, MD

Please do what's right for the Environment and Maryland. Don't be like Trump, a destroyer of all that's good, natural and beautiful in Maryland.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Eric Howell

Chevy Chase, MD

Please help ensure clean air for our children. Thanks.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Jenny Lockwood

Bethesda, MD

Please help improve Maryland for everyone!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Shannon Neal

Waldorf, MD

Please help protect our planet for our children!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Jennifer Williamson

Towson, MD

Please help us take a stand in limiting air pollution! Our future & our childrens future depends on it!
Thank you

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Rita Rotunno

Abingdon, MD

Please lead Maryland in the right direction for the future. As one of your constituents living near 495 and 270, reducing vehicle traffic and emissions while increasing access to public transportation is one of my top priorities.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Holly Welch

Potomac, MD

Please make the region as healthy as possible by reducing harmful fossil fuels into the atmosphere. Thanks.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Susan Levin

Chevy Chase, MD

Please protect the lungs of kids with asthma like mine. Cutting climate eve Issue a protects the health of the most vulnerable Marylanders.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Julie Dunlap

Columbia, MD

Please put our hard-earned tax dollars into transit, not more asphalt. We need to entice people to leave their cars at home. Reliable, efficient, cost-effective transit is the wave of the future. It works so well in Europe and we can make it work here. Please put our tax dollars to work on improving transit!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Sally Stolz

Rockville, MD

Please rethink plans to widen highways and instead invest in plans for clean and reliable public transportation. Air pollution affects us all. And the more fossil fuels we use, the worse global warming will become, with devastating effects on health, the economy, and our very lives.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Elizabeth Fixsen

Savage, MD

Please send me a copy of the Transportation and Climate Initiative

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Jed Ivory

Gaithersburg, MD

Please support green energy initiatives that also provide good paying jobs!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Joan Worrall

Ocean City, MD

Please support improvements in public transportation

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

jennifer ramelmeier

clarksville, MD

Please think of our future instead of funding oil companies that do not care about us.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Kelsey Terrell

Columbia, MD

Please! We all want our children and grandchildren to breathe clean air.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Denise Peach

Arnold, MD

Please, also remember that with the nations CAFE standards in flux we need to enact our own protections for the good of the people and the environment. First and foremost, regardless of what is causing climate change, burning fossil fuels creates some the nastiest pollution!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Brian Richards

Myersville, MD

Protect the planet and protect us all.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Christine Grewell

Silver Spring, MD

Public transportation must be affordable to riders and dependable if we are to get people out of their cars.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Lois Hybl

Baltimore, MD

Right now, transportation is the biggest emitter of CO2 gases in the atmosphere. We need to switch to cleaner ways of getting from one place to another.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Judith Wierzbowski

Glen Burnie, MD

Save our planet for my kids

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Anthony Meoni

Highland, MD

States across the region are trying to protect the climate and improve transportation with the Transportation & Climate Initiative. The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, the healthier our air is and the more lives we save. Dirty energy companies and their allies don't want you to know that, because they want to keep taking your hard-earned money. Governors from across the Northeast and Mid-Atlantic released a draft agreement to limit climate pollution from motor fuels and invest in an economy built on clean transportation. These changes will reduce traffic congestion, make clean vehicles more accessible, increase jobs, and grow the economy. It's time to fight to big polluters and tell your governor to make our communities healthier and more prosperous.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Edward Demers

BETHESDA, MD

Support clean energy!!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Janelle McWethy

Hanover, MD

thank you for reading my message

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Tiffany Englander

GREENBELT, MD

Thank you for your time and consideration in this matter.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Dawn King

Rosedale, MD

Thank you.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Marian Hull

Rockville, MD

thanks for helping clean up our earth

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Jeanne Reese

Pasadena, MD

The Bay matters. Our water quality and air quality matter. Asthma and other breathing problems matter. My family and I vote on environmental issues.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Katherine Richards

Olney, MD

The climate crisis is here, now. We are already behind. We must do everything we can to reduce carbon emissions as much as possible, as soon as possible. Our children's future depends on it.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Heidi Strom Moon

Silver Spring, MD

The traffic and pollution on 270 and 495 is only going to get worse in the future and a plan to reduce the number of cars on the roads is the only solution. A plan that reduces emissions and provides a sound transportation system is the only way to address this problem.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Matthew Vogt

Gaithersburg, MD

The urgency increases daily. We must take bold transformational actions for our children and their children and all future generations. Be part of that bold leadership to sustain a livable planet for all of us.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Vicki Ferguson

Takoma Park, MD

Think about what climate change is going to do to the eastern shore.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Dave Arndt

Potomac, MD

This is a no-brainer, and an easy decision for a State that prides itself with being forward thinking and acting. Thanks for fulfilling that promise.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Dorothy Rosenthal

Towson, MD

This is an investment in the future. It will cost less if we act now, than if we kick the can further down the road. Now is the time to Act!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Robert Erdman

Potomac, MD

This is important to save our planet

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Marsha Albrecht

Ocean Pines, MD

This is the final hour, when we need to initiate changes to save our environment for our children and grandchildren. In the absence of strong action, they face a very dismal future.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Charles Sadler

Huntingtown, MD

This is very important step in MD to do our share in reducing Climate Crisis that affects each and everyone of us and our children.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Paula Willey

Mount Airy, MD

This legislation is so logical and clear in its protection of citizens and benefit to our communities that to not support it would be political suicide. We need this type of legislation in order to have any chance of averting serious damage to our living world. Please support.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

John Treadwell Jr

Bethesda, MD

This state is very congested with traffic which diminishes our quality of life and harms the environment. Mass transit, not more lanes of highway is the most logical way forward at this critical juncture for fighting climate change.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Rebecca Pelland

Windsor Mill, MD

To help our children breath clean air and preserve their lungs we have purchased a hybrid car, switched from gas and coal fired electricity. Gas and Oil may seem less expensive, but the savings In Medical expenses as well as pain and suffering will be enormous. I have watched a family member die, due to smog. Wind and solar powered energy sources need to be expanded.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Graydon Moss

Silver Spring, MD

Today is final vote to remove trump and Mitch McConnell out of the Oval Office and Capital Hill.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Keshav Lincoln

Gaithersburg, MD

Traffic in s Baltimore is a ridiculous mess! It slows traffic, makes busses late, make it more dangerous for walkers. You took money intended for Baltimore & residents were not supporting the subway extension over here. Well we need something ! Please fix the problem.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Maryanna Bond

Baltimore, MD

Traffic in the MD/DC corridors cost my family WEEKS of their lives every year.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Susan Schluederberg

Bel Air, MD

Unless and until leaders like you step up to take necessary action to mitigate the worst of climate change, we as a society will fail and will leave a wrecked environment for our children and grandchildren to cope with. That's simply not an acceptable outcome.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Robert Serio

Catonsville, MD

We all have to do our part NOW. We can't wait. Although on a fixed income, I have elected to spend more for electricity from renewables rather than use cheaper coal and contribute to pollution from coal. We must do all possible to reduce effects of climate change.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Ruth Oppenheimer

Cockeysville, MD

We are in a climate crisis. If we don't act soon then it will be too late! As a marine science student, this is issue is very important to me. Small changes add up to make solutions to big problems.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Rose Hancock

Callaway, MD

We are in the position as leaders, parents, and guardians to make a long term impact. Big business should be doing all they can to improve the lives of the people that support them. not only this generation but future generations as well.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Gerald Gionet

Bel Air, MD

We can do so much better than this. Let's set an example and lead the way!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Francine Lampros-Klein

Baltimore, MD

We must do more to deal with the climate crisis. We can not wait and assume that things will get better.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Vivian Moore

Cumberland, MD

We need and want more places to walk and bicycle safely for my wife and I, my daughter, my son-in-law, and my grandsons who all live in Maryland, but really for all Marylanders.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Richard Reis

Silver Spring, MD

We need to address climate change!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Darcy King-Leatham

Chevy Chase, MD

We need to do absolutely everything we can to undo and stop further damage to our planet and living conditions. Thank you.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Deborah Smith

Baltimore, MD

We need TRAINS, dear Larry. With best wishes and kind regards malgo

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Malgorzata Schmidt

Frederick, MD

We want to live...all of existence.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Jenifer Almond

Baltimore, MD

What drives your decision on this? My touchstone is "What's best for my kids' future?" They're 4 and 6 years old, and they face an uncertain future if we keep making decisions based on short-term costs, instead of all the benefits we'll see both now and into the future if we move forward with good policies like TCI.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Matthew Shudtz

BALTIMORE, MD

What i love about maryland is access to nature. What a physically beautiful place to live. Please dont screw it up by so much constant development and taking away green spaces!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Robin Yang

Chevy Chase, MD

When there's a question of avoiding climate change, or seeming to make life a bit better today, think of the FUTURE!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Sally Gagne

Silver Spring, MD

With a growing population, there needs improved transportation. Unfortunately, any increase has adverse effects on the environment. To minimize the impact on the environment due to transportation I think that: 1. Gas tax should be increased initially to at least \$1/gallon with the revenue going to public transportation and electric car infrastructure. 2. If more toll roads are built, 50% of the revenue should go to public transportation. 3. The sales tax on electric vehicles be eliminated. Thank you for your consideration.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Robert Peters

Silver Spring, MD

You have already allowed the NextGen toxic noise and particulate pollution that is poisoning of our homes, gardens, neighborhood, and ruining lives psychologically, physically, and financially. How about addressing polluting transportation without endless road building?

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Sunil Misra

Columbia, MD

You know, even if you don't believe in climate change, auto emissions are still polluting to our air in ways that injure our health and the health of our natural environment and we should want to limit it. It is hard to understand why someone would not want to limit air pollution. And our traffic congestion is intolerable. Adding more cars to more roads just is not sustainable. We need to transition to mass public transportation. I hope you will support the TCI.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Annapolis, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Perry Levin

Rockville, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Rachel Towbin

Potomac, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Marsha Ansel

Hampstead, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Tracey Smallwood

Waldorf, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Sarah Peters

Silver Spring, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Shirley Ford

Emmitsburg, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Cecilia Dalnekoff

Annapolis, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Kathleen Beres

Mitchellville, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Dane Crook

Bel Air, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. George Kramer

Laurel, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Josephine Cohen

Darlington, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Louisa Quittman

Gaithersburg, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Noreen Hyre

Bowie, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Carlisle Wiley

North Beach, MD

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI).
