

A common sense Agreement to address the catastrophe of global warming. Let's get on this. We're already way behind on the issue of climate change, already having created drastic changes to our climate and ecosystem that will forever change our world.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Richard Nelson

Marble, NC

As a person of faith, caring for Creation is something I find repeated in Scripture. If we ignore what is fast becoming a climate emergency, we may be destined to be a part of the sixth great extinction, science proves is already building. For what is Divine & for the children of all that live, sign onto TCI.  
Charles Jansen

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). As a pharmacist I am aware of the effects of air pollution on sensitive individuals. In addition, traffic issues have a huge negative impact on the daily quality of life of Americans. We need government support for electric cars, upgrades for public transit (including mid-size cities) and the feds need to listen to governors and mayor's who are in touch with what is needed. Please sign this agreement and support green, effective, and efficient transportation for America.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Asheville is getting smothered with the increasing people and their vehicles these days. Indications are that local politicians and administrators are going to take steps toward much-needed increases in public transport and it definitely is past time to rein in Duke Power from using technologies that pollute and transitioning meaningfully to renewables. The steps they've taken so far are appreciated but are still grossly insufficient. Please take all the action you can in that direction.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Asheville/Buncombe County needs an infusion of money from the state and local governments to develop a viable transportation plan for our area, not just widening Hwy 26 for truck traffic, but developing public transportation systems that really work for working people, for tourists, for people doing ordinary errands. We need a system of electric trains and buses and connects the rural and urban parts of our counties.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Cars pollute about 5 pounds of carbon per mile. PBS's Nova "Polar Extremes" put a devastating visual picture of the amount of vehicular carbon emitted per mile to per year. We have raised CO2 levels higher than ever in our world's history. We have gone over a tipping point for survival on this world. It is critical to block expansion and production of fossil-fueled vehicles and move immediately to clean renewable-fueled vehicles ASAP.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Green House Gase emissions account for about 25% of the US's total emissions. We must reduce these vehicle emissions for our health and the planet's.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Rob Myers

Raleigh, NC

---

I commute from Waynesville to Asheville in my Nissan Leaf which cost me only \$6500. No emissions! It can be done!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Robert Orr

Waynesville, NC

I feel it is also very important that we increase the efforts for Complete Streets which make it possible for folks on foot and on bikes or riding transit to safely get around in our communities.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Claudia Nix

Asheville, NC

---

I hope we can get away from fossil fuels. We need to. We bought hybrid cars to save at least some gas. We spent extra for the hybrid version but I hear that we are to be charged an extra fee because we don't buy as much fuel for our cars. This disgusts me. No good deed goes unpunished.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

John Rae

Charlotte, NC

---

I know sir that you are doing your best against the odds of GREED from the Republican controlled State Senate. Please keep up the Good Work!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Craig Fedor

Greensboro, NC

---

I know we can create a cleaner transportation program by working together and learning from other states and countries who are leading the way. Do not leave NC in the dust!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Anna Campbell

Wilmington, NC

---

I know you will support this initiative, Roy Cooper. It's why I support you for governor!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Barbara Hardie

Sylva,, NC

---

I lived thru the oil embargo of the 1970's and our resolve to end our dependence on fossil fuel. I watched the Cuyahoga River burn because industry DOES NOT self-regulate. The USA must do better on both energy standards and environmental protections! Please support no emissions as well as demand increased fuel economy standards.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Patricia Liechti

Leland, NC

Our house is on fire. I await your reply.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Lawrence Turk RN

Hendersonville, NC

---

Our president is a joke. He has set back environmental standards years with his executive orders!! I remember the smog of the 70s and Iron Eyes Cody crying in tv ads about pollution. Let's NOT turn back time

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Carla Smith

Newton, NC

Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Barbara Zaretsky

Asheville, NC

---

This is critical

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Camille Welch

Fayetteville, NC

---

This is extremely important and I implore you to take the necessary steps to ensure a clean climate and obliterating the dirty energy companies

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

We are a Transportation hub, with international Shipping, Trucks, Rail, Air Cargo and Customs Inspections import - as well as a Tourist, Arts, Academic, Health care and Shopping destination. We have unmitigated growth spraul , and unenforced environmental protections. Polluters here are unaccountable. When the wind shifts and mingeles the toxic effluent from industries on the Cape Fear River people drop dead on the street. I am watching all life, flora, fish and fauna die before my very eyes. STOP POISONING US!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Lynn Spees

Hickory, NC

---

We are in a climate emergency and we must act like it. Bold action is needed immediately to address this threat. North Carolina has the opportunity to be energy independent by producing all of our energy from renewables right here. The Atlantic Coast Pipeline must be stopped. It is an unwise investment and will harm North Carolina communities. Duke energy is a public utility and must work for the public good not for private profiteering. We need a new energy infrastructure and transportation model. Transition to a green economy will create great jobs for North Carolinians and protect our and our children's future. Thank you.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Parrick Berger

Asheville, NC

---

We don't have much time to reverse the effects of climate change. Please act on this quickly.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. While I truly appreciate all you do to mitigate climate change, I'm letting you know we are behind you 110% when you show the courageous leadership in making the hard, but right, decisions related to climate change. I'm afraid the transition to renewables could hit people in the pocketbook, but we need to do it for the sake of future generations and just doing the right thing. My father had a saying he got from his father, of something being 'right as rain'. That impressed me, and helps reassure me when making tough decisions. God bless you for all you do, Alice Brower

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

De Corum

Durham, NC

---

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

---

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Tammy Carter

Wilmington, NC

---

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

---

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Robert Becquet

Broadway, NC

---

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Kevin Fitzpatrick

Highlands, NC

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.
