

I urge you to commit to working constructively with the Wolf Administration to help design a regional regulation to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

---

When Big Energy is paying for your political campaign why would you side with the people you're supposed to represent ?? Who cares about clean air or clean water anyway ??

I urge you to commit to working constructively with the Wolf Administration to help design a regional regulation to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Arthur Antal

Wellsboro, PA

Dear Senator, Transportation is a huge opportunity for us shift our approach and modernize our lives in a way that will positively impact our climate. But it takes political will to create the environment that supports and encourages change in our lives i

I urge you to commit to working constructively with the Wolf Administration to help design a regional regulation to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Jason Tremblay

Media, PA

---

We ALL need to participate in reducing our Carbon Footprints. Representatives have the power to do more. Please listen to our voices! Thank you!!!

I urge you to commit to working constructively with the Wolf Administration to help design a regional regulation to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Gail Landers

Williamsport, PA

Coal Township, PA

---

I urge you to commit to working constructively with the Wolf Administration to help design a regional regulation to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Katherine Boas

Lancaster, PA

---

I urge you to commit to working constructively with the Wolf Administration to help design a regional regulation to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Phoenixville, PA

---

Please help ensure a cleaner healthier future for our children and grandchildren by supporting Pennsylvania's participation in the TCI.

I urge you to commit to working constructively with the Wolf Administration to help design a regional regulation to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Charles Mahler

Williamsport, PA

---

We must take action now to reduce carbon emissions if we want our children to have a viable future.

I urge you to commit to working constructively with the Wolf Administration to help design a regional regulation to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

The evidence is clear: The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Kathleen Johnson

Bloomsburg, PA

---

I urge you to commit to working constructively with the Wolf Administration to help design a regional regulation to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

The evidence is clear: The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Larry Falkenau

Landenberg, PA

---

I urge you to commit to working constructively with the Wolf Administration to help design a regional regulation to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: The more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Pennsylvania needs to be a full participant in TCI. We can no longer deny the threat of climate disruption, or put off action indefinitely. I urge you to collaborate with the Wolf Administration to identify transportation investments that will benefit your constituents, that invest in communities that have the least access to clean transportation options, and protect us from dangerous air pollution. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.
