

As a retired RN with a Masters in Community Health, I congratulate you if you have signed the regional agreement to limit climate pollution, if you have not yet signed this vital agreement, I ask that you will??

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Carol Tessman

Wakefield, RI

---

Cutting pollution and chemicals in the environment are the he most important thing we can do for our children and future generations.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Nancy Tanner

Dear Governor Raimondo. Let's do everything in our power to save the earth/climate- ocean, air, plants, animals and humans. Is there anything more important? Well, beating Trump equally important because he's rolling back all things intended to protect our environment. Karen

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

I emphatically urge you to sign on to the Transportation and Climate Initiative. I and many of my friends here in Westerly want Rhode Island to show leadership in dealing with the climate crisis we face, and we're perfectly willing to pay higher fuel prices in the process.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

I've never had asthma- but stepping out of the plane in Chicago, San Francisco, Dallas, or the train in New York & Boston makes me want to get right back on. This is unconscionable. It's not like we lack your knowledge or technology. As an ER RN & a Cardiac researcher I can tell you how shocked I am at the number of kids who have no trouble using respirators & taking meds. This is not the world that I arrived in & certainly not the way it should be left. This Initiative sounds like something that can be done. It's time he states got behind their own problems instead of waiting on the Federal government. Thanks!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Morning and evening rush hours (strange to call them rush hours) in and around Providence are usually a nightmare. Slow moving traffic that can back up for a couple of miles. Not just the time spent in traffic but also adding to air pollution.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. We are not doing enough to fight climate change, air pollution and energy inefficiency. Fossil fuel use in our transportation system must be addressed. Thank you for all the actions that are in place and being planned but it is not enough. I would guess that one aspect of synergy in these plans is that electric vehicles would commonly charge vehicle batteries at night and take advantage of off peak production from wind turbines. Thank you for your continuing leadership.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.
