

Aggressive action must be taken to electrify our transportation system and to provide much more mass transit. This policy will be an important step.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Natalie Pien

Leesburg, VA

---

Also do not forget about upgrading bike paths and adding new ones in Virginia.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Ron Erdmann

Arlington, VA

---

Alternative energy solutions are the way of the future, as I'm sure you'll agree. The technology is available and carbon based energies must become a thing of the past. There are many greedy corporate and financial institutions that will try to block such a maneuver but my children and their children's children, must be able to have a better future with a clean environment. The world depends on this important change with the elimination of these fossil fuels. TY for the fight.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Michael Sabol

Virginia Beach, VA

---

And, separately, please assure that state retirement plans and other state funds divest all of their investments in fossil fuel companies. I know this is a hard decision given the place of coal mining in our state, but is it better to have Virginia Beach under water?

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Alison Sheahan

Arlington, VA

---

As I sit here in Arlington, Virginia I am currently witnessing a monsoon out my window, in February. I've been here for 22 years and have never seen anything like this. We need to make this transition and we need to make it quickly. This initiative is one of many that we'll need going forward. Relying on market forces won't be enough. We need governments to act.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Mark Stevens

Arlington, VA

---

At the very least, we should enact anti-idling legislation, limiting the time a driver may idle his vehicle's engine while waiting for someone or sitting in a "fast" food line. After all, 10 seconds of idling a vehicle is the amount of gas needed to turn it off and then back on. No one ever runs into a store for "just a minute." This would require more education than enforcement hopefully and also decrease fuel use in general. In Europe, several vehicles I rented recently, automatically cut off while we were waiting either for a light or other times we were not moving.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Erik Harris

Fairfax Station, VA

---

Climate change isn't something that will happen in the future or far from Virginia, and it is up to us to start doing something about it--urgently. We can't just talk about these things any longer. For decades our state and federal economies have ignored the costs of fossil fuels and the pollutants that arise from all parts of their use--from extraction, shipping, burning, and waste--while the profits go to corporations. Society, in the meantime, pays for the effects of that pollution, including the health of individuals and communities. We must change the calculation and invest in cleaner transportation alternatives that leave the value in the communities.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Kathleen Kelly

Nellysford, VA

Susan D Howell

Woodbridge, VA

---

Governor Northam, I know these times are intense, and politics are more divisive than ever, and disinformation is going viral, and attacks on every level are ramped up, but I am so grateful for your governorship! I am so grateful for your progressive values, and understanding the need for Virginia to make a stand and be a leader on the climate issues that put our Mother Earth in jeopardy. Support of the TCI, and of the Green New Deal Act, and the Solar Freedom Bill, and the Virginia Clean Economy Act is what we voted for! Thank you, Donelle Sawyer

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Donelle Sawyer

Vienna, VA

---

Governor Northam, I moved to Virginia, having lived in five other states and two other countries, because Virginia is where I want to invest my time and talents--Virginia is where I want to buy my first home and start a family. However, Virginia also has by far the worst transit options of anywhere I've lived, including cities in Nebraska and the "car country" Southwest. Strong public transit is vital to a robust, equitable economy; its growth, combined with drastically cutting pollution, is essential to all of our personal well-being.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Micah Hadley

Richmond, VA

---

Governor Northam, please sign this agreement! Taking action on climate action must include strong transportation commitments. This is the only pollutant increasing in the Chesapeake Bay watershed from runoff.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Mary-Stuart Torbeck

Richmond, VA

---

Governor, the citizens of Virginia need your support now for clean energy initiatives to protect the public health and welfare, thank you!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Mitchell FLEISHER MD DHT DABFM

Afton, VA

---

Governor, with recent news reporting that fossil fuels are contributing even more methane to the atmosphere than previously thought, this initiative becomes even more urgent. Please begin with this action and continue to encourage a clean world for our descendants.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Tom Johnson

Richmond, VA

---

Helping our climate is the most important thing to do right now.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Carolyn Barker

ALDIE, VA

---

I am a retired public school teacher. I always worried about toxic fumes emitted from school buses. Electric school buses will eliminate exposing our children to toxic emissions and reduce green house gas emissions.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Natalie Pien

Leesburg, VA

---

I am proud that you are my Governor.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Liana Valente

Alexandria, VA

---

I don't drive ,but I ride with people who do ,and am tired of being stuck in traffic.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Lori Shapiro

Norfolk, VA

---

I have been a resident of NoVA for over 15 years and, while I appreciate the quality of life offered by this part of the Commonwealth, I have been dismayed by its transportation challenges - problematic to the point of negating what this area has to offer. 'Clean transportation' must be part of the future and is more readily achievable than other parts of the 'green agenda'. As a fellow healthcare provider for children - one who thoroughly understands the importance of maximizing every child's full developmental potential - I urge you to follow the lead of other States, e.g. CA, in addressing this challenge in a thorough, evidence-based and timely fashion.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

I have two young grandchildren and want the environment to be safe for them

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Jane Comings

Arlington, VA

---

I recognize that some sacrifice will be involved in this initiative, but I still think that it is vital for Virginia to participate in this regional agreement and do our part toward this worthwhile effort. Things that are worthwhile often aren't easy, but they pay off in the end. Please support our state's participation in these efforts to have clean transportation and limit pollution! Thank you for your consideration!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Linda Schneider

Arlington, VA

If we are serious in believing that we need to limit carbon pollution from motor vehicles, the government needs to provide public transportation to its citizens. We do not need bigger highways, we need more metros, trams, electric buses and trains.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Maria Taub

Alexandria, VA

Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

David Coakley

Alexandria, VA

---

It is pointless to add more lanes to I-95 between Richmond and Washington DC, or along I-81. Within a few years, the traffic jams will be back and the streets in DC and Richmond would have to be widened, at great cost to the taxpayers, to accommodate the additional influx of cars along the newly widened highway corridor. What we really need is to put in rapid transit, bullet trains or monorails between major population centers and within our major cities to reduce traffic and increase the quality of urban life. Certainly people will still need cars to go shopping or visit small towns and the country side but it is ridiculous for citizens to have to rely on them for daily commuting between major towns and cities. Please help create a better, healthier lifestyle for Americans and stop accommodating the interests of the automobile and oil industry by neglecting what obviously needs to be done to improve our lives and the life of our planet! David Gaines

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Please know how important climate change is to me as a voting citizen. There are none bigger. We MUST act now in Virginia and send a message to the nation. Please take the lead on this issue Governor Northam

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Charles Stathos

Charlottesville, VA

---

Please sign this legislation. We must take all measures to decrease the flooding, erosion and essentially the way we know the world for our children and theirs.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Amanda Robinson

Virginia Beach, VA

---

Please support

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Roberto Lovick

Norfolk, VA

Please support clean transportation in Virginia. I live in Northern Virginia and we are not going to pave our way to better transportation in our area. Past transportation planning has just led to gridlock and air pollution. We need better options in order to protect the region's economy and quality of life.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. The public is only going to increase its prioritization if climate issues; we will have to act. Why not do it earlier, while there are more and better choices? Once solutions are forced upon us, the effects of climate change will be even more devastating and will come with significant loss of life. Waiting is the wrong decision by every measure.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Ivy Main

McLean, VA

---

VA can be a leader in reducing our carbon output. Support replacing government vehicles with electric cars and build the infrastructure for charging them around the state on the highways and municipal buildings. We need to invest in alternative fuels as we have begun with wind farms off shore. With the largest data centers concentrated in Loudoun County we need alternative safe backup electricity sources instead of dirty polluting diesel generators.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Gail Pean

Leesburg, VA

We can't wait for change any longer. The time is now.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Htoijan Maran

Alexandria, VA

---

We have grandchildren!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Fred And Joan Quaderer

Roanoke, VA

---

We have to protect our climate! Stand up to the big oil companies, our state, the people, and our country will be better for it.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. We need clean!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Charles Kleymeyer

Arlington, VA

---

We need this action now more than ever; since the "Stable Genius" is doing nothing about Climate Change. Get this done don't mess this one up like you did the Assault Weapon Ban.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

William Schreier

North Chesterfield, VA

---

We need to move away from oil and gas. We don't have decades to do this. Our children and grandchildren need to have clean air to breathe and we need to stop climate change now!!!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Beverly Bugos

McLean, VA

---

We need your help with the TCI. The more the economy grows, the healthier our air is and the more lives we save. Please help us build an economy built on clean transportation.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Mary-Ann Shisler

Harrisonburg, VA

---

We should lead the efforts, not be left behind. Thank you!

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Tanya Kruk

Chesapeake, VA

---

We've gotta lead the way for the southern states to actually give a damn about the climate.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Kevin Arnold

Altavista, VA

---

What good does it do humans to have modern medicine that allows us to live longer, only to be killed by the toxins we breathe? Please help all of us breathe better by cleaner air. Get rid of toxic car exhaust systems.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Holly Shaddle-Sword

harborton, VA

---

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Lisa Schirch

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Anne Ridge

Charlottesville, VA

---

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

---

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Maureen Mahaney

Midlothian, VA

---

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Michael Love

Blacksburg, VA

Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.
