

Again, from Pownal, I thank you.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Raymond Rodrigues

Bennington, VT

---

All though's people, children and adults who suffer from pulmonary disease don't fair to well with pollution. I can attest to that as I suffer from COPD and being stuck in traffic with buses and trucks is suffocating.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Mark MacBrien

Waterbury, VT

Biodiversity loss is the greatest threat we face in the world; climate change is in if its devastating affects (though, as EO Wilson reminds us, it will take solving the biodiversity crisis to solve the climate crisis). This aspect of our transpirtation is part of the process, though how we do so must also fully care for and contribute to thorough conservation of biodiversity. ~ Ashley, a conservation ecology researcher and mentor

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they?re wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Ashley Bies

Brattleboro, VT

---

We must do everything we can, everything to mitigate our warming planet and the devastation to come. Look at Tennessee and Louisiana today

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

NANCY HAMOR

South Burlington, VT

---

We must move forward on a strong environmental protection policy for VT. I believe it will help attract more people to the state. I believe this policy should be in place to show how forward we are in VT.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Beatrice Parwatikar

SHOREHAM, VT

Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Denise Ciastko

North Clarendon, VT

---

We need to address the issues we face as a rural state where people are spread out and drive a lot. Transportation is probably our biggest contributor to carbon in the climate. Vermont needs to do its part to address this and we don't have time to delay. The window for delay has shut and the clock is ticking toward midnight.

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.

Robin Hartzell

Washington, VT

---

Thank you for helping to design a regional policy to limit climate pollution from motor fuels and invest in a modern, clean, transportation future through the Transportation and Climate Initiative (TCI). The evidence is clear: the more we limit pollution from motor fuels, the more jobs are created, the more the economy grows, and the more lives we save. Dirty energy companies and their allies who want us to buy more gasoline and stay stuck in traffic think they can keep people from realizing that simple truth by talking about gas prices, but they're wrong. Please sign on to the agreement to implement a strong, equitable regional climate protection policy through TCI. Invest in the communities that have suffered the most from burning gasoline and have the least access to clean transportation options. Stop sending our hard-earned dollars out of the state to oil companies, and choose to create jobs, grow the economy, and save lives for families and businesses right here.
